

Online Data Backup

How much would the loss of company information and records cost your business, both for you and your customers? Whether through hardware failure, human error, fire, theft or accidental damage, losing company accounts, sales records or customer data can have a catastrophic effect.

Data loss is unavoidable. It is not a case of if, but when this will happen. According to a study by Gartner 25% of all PC users suffer from data loss each year.

Online data backup provides you with the peace of mind that, in the event of data loss, your data is fully backed up and recoverable within minutes. Our solutions allow you to set your own desired backup schedule, providing additional flexibility. On schedule, or on demand, your data is automatically compressed, encrypted and sent to a secure primary data centre. Your data is then mirrored to a secondary data centre for extra protection. To retrieve your data you simply launch the online data backup application on your PC, laptop or server and select the files that you need.

Offering the choice of two products - Zen Vault Express and Zen Vault Professional - these backup solutions provide powerful, reliable and secure offsite data backup for SOHO, small and medium sized businesses.

Zen's primary data backup facility at TelecityGroup, Manchester.

Zen Vault Express

Whether it is a result of hardware failure, human error, fire or theft, data loss can have serious implications. Zen Vault Express is ideal for small business and SOHO customers, especially those with roaming laptop-based employees, as it enables companies to take control of backups and ensures security of critical data. Zen Vault Express is compatible with Windows XP, 2000 Pro, Vista and MAC OSX.

Features:

- Easy setup
- Automatic backup
- Incremental backup
- Backup open files
- Data compression
- Data encryption
- Single file restore

Ideal for the small office and home office - 1 month minimum contract.

Zen Vault Express offers a simple 'set-and-forget' daily online backup service that will securely backup data from laptops and desktops and restore it on demand 24/7. Data is encrypted before it leaves your PC, preventing unauthorised viewing or access at the earliest opportunity.

By eliminating the requirement for backup hardware, the process is streamlined and will save you money. With quick and easy setup and a flexible upgrade path, Zen Vault Express represents a scalable and effective solution.

Zen Vault Professional

Zen Vault Professional enables you to manage more demanding server environments just as simply and effectively. Its compatibility with all major operating systems, such as Windows Server 2000/2003/2007, Apple Mac, and major Linux distributions provides solutions for most businesses.

A centralised server is likely to be at the heart of any company's network, therefore it is critical that the choice of backup reflects this. Zen Vault Professional offers system state backup and flexible scheduling, together with detailed backup reporting to provide peace of mind for administrators managing unattended servers.

Additional plug-ins for the backup and recovery of Microsoft® Exchange and Microsoft® SQL ensure business critical applications can be secured, even when they are in use.

Features:

- Automatic & system state backup
- Backup open files
- Comprehensive e-mail reporting
- Snapshot reporting
- Multiple OS support
- Plug-ins for Microsoft® Exchange and SQL
- Single file restore

Ideal for the small office and medium office - 1 month minimum contract.

Zen Vault Professional runs as a local service, together with offering a simple yet powerful 'set-and-forget' daily backup process. It therefore represents the perfect solution for administrators of unattended servers as it provides maximum data protection for minimum effort – an all-round efficient and cost effective solution.
