

Broadband Voice

Broadband Voice from Zen Internet is an easily set-up telephony solution, ideal for anyone looking to lower their communication costs and benefit from a free second, outgoing telephone line.*

With 1,000 inclusive minutes for just £5.10 a month, Broadband Voice gives you this second outgoing telephone line without having to pay for an additional line rental, all delivered over our award-winning Broadband service.

Using VoIP (Voice over Internet Protocol) technology, **Broadband Voice** has no installation or activation charges. It's easy to set-up, the service can be provided using an automatic "Plug and Play" configuration process using Zen's recommended Thomson TG784 router or the settings can be entered manually to a compatible VoIP router or VoIP handset.

You can also make calls from your PC this requires a compatible headset and a small software application that can be downloaded free of charge from the Zen Internet web site.

In line with our award-winning Broadband services we have a minimum 1 month contract and unlike most other providers, Zen do not have a minimum call, set up or call connection fee for any calls to a UK landline, mobile or international telephone number.

*Please note, this is an outgoing service only

Features of Zen Broadband Voice

- Easy to set-up and simple to use, service set-up within the hour
- 1,000 anytime minutes to UK landlines (01/02/03/0870 numbers)
- No minimum call, call connection or call set up fees
- Makes outgoing calls over existing Broadband connection
- Minimum 1 month contract in line with Zen's Broadband services
- FREE calls to Zen and other Zen Broadband Voice users
- International calls from only 2.4p per minute
- Monitor your call charges using Zen's Customer Portal

What you will need to connect to Broadband Voice:

- An award-winning Zen Internet connection
- A BT Phone Line for your Broadband Connection and incoming calls
- A Broadband Voice username, password and server details
- A router, voice gateway with touchtone telephone/s or VoIP handset

Our mission is to provide the best ISP service in the UK.

Richard Tang,
Managing Director

That's Zen thinking

Product Guide

Asia	From 2.4p	From 2.4p
Africa	From 7.2p	From 9.6p
Oceania	From 2.4p	From 21.6p

Please note that all prices are per minute and include VAT. Prices valid from January 2011

Zen's recommended hardware

The Thomson TG784 is an integrated, "plug and play" all-in-one voice and broadband router. This means that this router not only provides you with broadband access, but also enables you to make Broadband Voice calls and receive telephone calls without your PC being switched on.

Softphones

A softphone is software application that can allow you to make Broadband Voice calls via a PC or laptop using a microphone. Softphone software can be downloaded from the Internet. You can only make or receive calls using a softphone when your equipment is switched on and connected to a Zen Broadband or equivalent Zen service and is correctly configured with your Broadband Voice username, password and service settings.

When using a softphone you may not be able to use specific services such as those used by Zen that allow us to route your call to the correct department by pressing the correct telephone key.

Note: It is not recommended to make 999 calls from a softphone.

Zen Internet does not provide technical support for any softphone application installed on your equipment.

Alternative hardware options for using Broadband Voice

You don't need to purchase Zen's recommended hardware to be able to take advantage of our broadband voice service as you can also utilise Broadband Voice through:

- Your existing Broadband / Voice router or purchase a router of your choice
- Your existing VoIP handset that supports the SIP protocol or purchase a handset of your choice that connects to your router

Ordering the service:

To order Zen Internet Broadband Voice visit our website at www.zen.co.uk/business/voice/voip/broadband-voice-overview.aspx or call us on 0845 058 9000

Once an order is placed the service is operational for you to use within one hour.
