

International rates and banding

Our international pricing structure splits all destinations into five bands: A, B, C, D and E.

The costs for making calls (landline and mobile) to each of these bands are presented in our International Call Rate Tariff below and you can source the destination you're calling and find its applicable banding below.

Calls are subject to a minimum length of one second and are rounded up to the nearest minute (e.g. if a call lasts 25 seconds, it will be rounded up to one minute on your bill).
